May 26, 2017

Mr. Jeff Morales Chief Executive Officer California High-Speed Rail Authority 770 L Street, Suite 620 Sacramento, CA 95814

San Francisco to San Jose Peninsula Corridor Funding Plan

Dear Mr. Morales:

On January 3, 2017, pursuant to Streets and Highways Code section 2704.08 (d), you submitted a funding plan for the \$1.98 billion San Francisco to San Jose Peninsula Corridor electrification project. At that time you identified all funding sources for the project, but noted that the Federal Transit Administration (FTA) had deferred execution of the Full Funding Grant Agreement to provide Core Capacity funding of \$647 million to Caltrain for the project.

I informed you on March 3, 2017, that the funding plan would likely be successfully implemented as proposed but the federal decision left a significant gap in the project's financing plan. Solely due to that federal decision, I deferred action on the Peninsula Corridor Funding Plan. In the letter, I asked that the California High Speed Rail Authority (Authority) inform me once the federal funding for the project is secured so that I could make a final determination.

I have now received your letter dated May 24, 2017, stating that the FTA has approved the Full Funding Grant Agreement, thus securing the commitment of the full \$647 million in Core Capacity funding for the electrification project. Consistent with my March letter and upon review of the executed grant agreement, I find that the Peninsula Corridor Funding Plan submitted by the Authority is likely to be successfully implemented as proposed. The Authority may now enter into commitments to expend bond funds and accept offered commitments from private parties in support of the San Francisco to San Jose Peninsula Corridor segment.

Sincerely,

MICHAEL COHEN

San Francisco to San Jose Peninsula Corridor Funding Plan

Dear Mr. Morales:

In 2008, California Voters approved \$9.5 billion in bond funding for high-speed rail vittle Safe, Reliable High-speed Passenger Train Bond Act for the 21st Century (Proposition 1A). Under Proposition 1A as outlined in Speets and Highways (byte Section 2104.08(ct), the Display Highways (byte Section 2104.08(ct), the D

Theiriligh-Speed Rail Authority submitted a funding plan for the San Francisco to San Jose Peninsula Conidor to the Department of Finance on January 3, 2117. Proposition 1/4 requires that an independent consultant prepare a report assessing each funding plan. Finance has received and reviewed the independent consultant's report on the Peninsula Corridor funding plan. Finance also received and reviewed con. Pents by the Joint Legislative Budget Committee, other tegislators, the Legislative Analyst's Office, the Legislature's California High-Speed Rail Peer Review Group, and the Community Coalition on High-Speed Rail. Finance received and reviewed the Authority of response to the Legislative Analyst's Office's analysis of the plan, which strached the independent consultant's supplemental report evaluating projections of revenueland operating profit/loss.

Requirements under the Funding Plan

Froposition 1A requires the Authority to submit a funding plan that specifies the usable segment, timates self, entire construction costs identifies funding sources, provided a reportion projected rider this an operating reviews, describes changes since the preliminary 2011 funding plan, and outlines contract terms. These elements are reviewed below.

Usable Segment and Construction Costs

TheiPerinaul Corridor funding plan identities the segment as from thei4th and King tation in Nan Francisco to Tamien Station in San Juse, which includes high-sped rainstations at 4th and King Station in san Francisco and Diridon tationan SaniJole. As for estimated construction costs, the funding plan estimates that it will cost \$1.98 billion to design and construct their electrified Litrastrum are and purchase vehicles.

Funding Sources

The funding plan for this segment identifies the amount, source, and estimated time of receipt for all construction funding. State, local, and federal funding have all been committed to this Project.

The Legislature has appropriated \$600 million of Proposition 1A bond funding for the Project. Proposition 1A states that, where feasible, the system should be placed within existing transportation comidors. The High-Speed Rail Authority's 2012 Business Plan outlined "bookend" projects in existing rail comidors where the Caltrain and Metrolink services operate which, after suitable investments are made, could accommodate high-speed rail service. The Legislature appropriated \$1.1 billion in bond funds for these bookend projects in Chapter 152, Statutes of 2012 (SB 1929). Chapter 216, Statutes of 2013 (SB 557), apportioned \$300 million of this amount for the electrification of Caltrain's rail service.

addition to \$600 million in Proposition 1A funding, the state hea committed up to \$113 million in Cap and Trade audition proceeds or other Authority resources, a \$20 million grant under the Transit and iiitercit; Rall _:apil.e! -.,para.to https://www.combinesendubicomatifePdgf143d4admw/mtcValley4@/wallediscr conpl€u?tier edistional plassanger train service providers will benefit from the project in the nearterm."

The funding plan notes that Caltrain will be able to start electrified service on this segment immediately upon completion of the Project, and indicates the Project will reduce overall run times and increase Caltrain ridership. The independent consultant concluded that the Project will provide significant near form benefit to ... [Caltrain's] passenger service operations" and that it will "provid(e) a foundation for eventual HSR service." The Authority's 2011 preliminary funding plan and its 2016 Business Plan indicated the Authority's rail service will not require a subsidy.

In response to requests for additional analysis, the independent consultant prepared a supplemental report evaluating the Authority's projections of revenue and operating profit/loss for the funding plan. This report confirms the Authority's conclusion that the planned level off service on the Peninsula is likely to be sufficient to operate without a subsidy after an initial start-up period.

Changes from the 2011 Funding Plan

Proposition 1A requires the Authority to describe any changes in this funding plan that differ materially from the funding plan required under Streets and Highways code section 2704.08(c). However, because the Legislature appropriated the funding for the Project without a plan, there is nothing against which to compare this funding plan.

Contract Terms

The funding plan includes a summary of the terms and conditions of the agreements the Authority has entered into for the construction or operation of the system, including a summary of the terms and conditions of the agreements that the Authority has entered into with Caltrain for the Project. Additionally, the Plan includes a summary of the construction agreements that Caltrain has entered into for the Project.

Risk Management

The independent consultant reviewed the Project and funding plan, identified risks, and offered strategies to address these risks. Additionally, the consultant concluded that Calirain "has a well-developed Risk Management Process." The Authority has indicated it will continue to monitor risks to the project overall and the segment identified in the plan in its blennial Business Plans and Project Update Reports. Finally, Proposition 1A requires the Authority to promptly update the Administration and Legislature when events occur that could endanger the completion of the segment cuttined in the funding plan and provide options to address these challenges.

Conclusion

As noted above, the February 17, 2017 latter from the Federal Transit Administration deferring the execution of the grant agreement to provide Core Capacity funding leaves a significant gapt in the Project's financing plan. Absent this federal decision, the Peninsula funding plan would likely have been successfully implemented as proposed. That is, Caltrain would have been ablel to enter commitments to expend the Proposition 1A bond funds along with the other sources off funding. However, the federal decision prevents me from reaching a conclusion regarding that Project's financial viability at this time. Therefore, solely due to the federal decision, I emit deferring action on the funding plan. This will allow more time for Caltrain to resolve that situation with the federal authorities. When the federal funding for the Project is secured, please inform me so i can make a final determination expeditiously.

Sincerely

MICHAEL COHEN

Director
